

IT transport container Atecase

IT transport container Atecase

Description

The Atecase is a modern and light-weight yet sturdy plastic container made from recyclable polyethylene. Thanks to its two rollers and pull-out handle, it's easy to pull along even with heavier weights. The container is suitable for storing, charging, and/or synchronising notebooks, netbooks, or tablets. It also features a WLAN access point, making it the perfect solution for mobile classrooms!

Arguments that'll convince you

- Light-weight yet robust construction
- Lockable and removable lid
- Electricity and LAN cable connections on the outside of the container
- Ventilation slits to prevent devices overheating while charging with the lid closed
- Plug & use: all necessary electrical plug-in points can be accessed in the case
- Connecting up devices is easy and effortless

Technical details

- Internal measurements of the container (length x width x depth):
550 x 420 x 320 mm, 650 x 450 x 400 mm, 800 x 500 x 420 mm
