

Technical information

Product: AteLocker with 12 fixed shelves

The ateLocker is a storage and charging solution. A robust metal cabinet with space for up to 12 notebooks, with a lockable front door and a fixture for wall mounting on the back. With fixed shelves, height between the shelves 100mm, dimensions of the shelf 400x420mm. Each compartment has 2x power sockets (SWISS or Schuko) and an additional 2x USB-A connection. Power is supplied via 230VDC, which is safely connected and locked in the service compartment after the cable has been inserted. In addition, 1x LAN connection (optional) can be added to each individual compartment if required. Mechanically secured access, simple cable management, overvoltage and current protection, as well as active fans (optional) makes the additional options complet.

Cabinet

Type (article number):	ateLocker12X-CH / -EU
